

The Digital Engagement Model

Contents

Chapter 1. Digital Engagement Shifts to a New Era

- 1.1 Consumer Behaviors Outpace Content Presentation
- 1.2 Attention Shifts to Multiple Sources
- 1.3 We Must Extend Beyond a Target Audience
- 1.4 Defining Engagement Can Be Complex
- 1.5 The Brain Is Fast But Still Limited
- 1.6 Content Presentations Now Need to Outpace Users
- 1.7 The Digital Engagement Model Targets Diverse Users
- 1.8 Human Creativity Is Unmatched By AI
- 1.9 For Some, a New Model Can Be Challenging

Chapter 2. A New Model Fills Some Theoretical Gaps

- 2.1 It Began With Uses and Gratifications Theory
- 2.2 Uses and Gratifications Theory Is Expanded
- 2.3 Other Communication Theories Have Emerged
- 2.4 Theory Defines the Concept of Interest
- 2.5 A Lack of Interest Can Also Signify Avoidance
- 2.6 A New Model Presents New Propositions

Chapter 3. Your Mind on Media

- 3.1 Your Attention Please
- 3.2 Neuroscience Defines Attention
- 3.3. Attention Differs from Engagement
- 3.4 Neuroplasticity Shapes Engagement
- 3.5 Continuous Partial Attention Is Ubiquitous
- 3.6 Attention Momentum is the Goal
- 3.7 The New Model Counters Disengagement

Chapter 4. Social Media Builds Attention

- 4.1 Engagement Extends Beyond Shares and Likes
- 4.2 Interactivity Is Only One Dimension of Engagement
- 4.3 Headlines Are Often Shared Without Consuming Their Message
- 4.4 Unexpected Content Can Instantly Engage Users
- 4.5 Short Videos Fuel Attention Momentum
- 4.6 AI Can Increase Engagement, but Not Credibility

Chapter 5. All Users Have a “Digital DIET”

- 5.1 There’s a Time and Place for a Target Audience
- 5.2. Add Individual Similarities to Individual Differences
- 5.3 Bridging Individual Differences With User Similarities
- 5.4 Defined Motivations Stem from Individual Similarities
- 5.5 **D** – Demographics Provide Opportunities to Personalize
- 5.6 **I** – Individual Interest Defines a Target Audience
- 5.7 **E** – A User’s Environment Includes Physical and Technological Factors
- 5.8 **T** –Time Affects Engagement, Even for Interested Users

Chapter 6. SPICE Content Generates Situational Interest

- 6.1 Incidental Exposure and Serendipity Are Not Synonymous
- 6.2 Situational Interest is Not as Important to Engage a Target Audience
- 6.3 Searching is Not Required to Access Engaging Content
- 6.4 **S** – Scannable Content Serves Scanners and Readers
- 6.5 **P** – Personalization Can Occur on Different Scales
- 6.6 **I** – Interactivity Engages Unless It Overwhelms
- 6.7 **C** – Curiosity Needs Curation After the First Click
- 6.8 **E** – Emotion Is a Cognitive Catalyst for Engagement

Chapter 7. Photos and Charts Must Explain Quickly

- 7.1 Photos With Context Explain
- 7.2 Photos Can Convey Attention-Getting Emotion Instantly
- 7.3 Photos Essays Can Be the Entire Story
- 7.4 Explanatory Charts Engage More Users
- 7.5 Simple Charts Simply Work
- 7.6 Striking Visualizations Can Still Overwhelm the Brain
- 7.7 Best Practices for Visualizations Extend Beyond Color and Interactivity
- 7.8 There's a Reason Why Video is the Dominant Visual Medium
- 7.9 Deceptive AI-generated Visuals Can Do More Harm Than Good

Chapter 8. The *Smart Story Suite* Offers a New Approach, Not a Single Template

- 8.1 It's Time to Implement Supporting Research for a *Smart Story*
- 8.2 The *Smart Story* Structure Requires a New Mindset
- 8.3 Progressive Disclosure Replaces Perpetual Scrolling
- 8.4 Users Compose Their Own Narratives Based on Their Interests and Needs
- 8.5 New *Latest Info* and *Fact-Checking* Options Promote Credibility
- 8.6 Tests Confirm Short-Form and Long-Form Structures Can Co-Exist
- 8.7 The *Smart Story Suite* Offers a Guide, Not a Single Template
